JUNIOR FULL-STACK DEVELOPER

▣ PROFILE

Motivated software developer with one year of experience in **full stack development** and a strong focus on **React**. Proficient in various **JavaScript frameworks**, languages, and cloud technologies particularly, **MERN stack and AWS**. Completed a comprehensive training in **Full Stack Web Development** and holds certifications in **AWS Cloud Practitioner** and **Developer Associate**. Seeking opportunities as a **junior-level Full Stack Web Developer** or **Cloud Engineer** to contribute to innovative projects. Open to exploring new challenges, learning new technologies, and expanding my skill set. Eager to contribute my knowledge and expertise to a dynamic team and create impactful solutions.

Competencies: Full Stack Web Development | Cloud Technologies | Continuous Integration | Documentation | Software Development Lifecycle | Problem Solving | Team Collaboration | Solution Presentations

▣ EXPERIENCES

Aug 2023 – Present: Three Enix Consulting, Kuala Lumpur, as Junior Software Developer

Responsibilities:

- **Develop Dynamic Web Applications:**
 - Focused on building dynamic web applications for content editing.
 - Leveraged the capabilities of **Magnolia CMS** to provide a robust content management solution.
- **Feature Development:**
 - Developed new features for existing web applications.
 - Ensured features met user requirements and enhanced overall functionality.
- **Bug Fixing and Monitoring:**
 - Actively monitored Jira tickets to solve bugs and issues promptly.
 - Ensured system stability and performance by addressing critical issues.
- **Change Request Implementation:**
 - Implemented change requests to enhance system capabilities and user experience

Projects:

- **Agent Portal Maintenance:**
 - Maintained and enhanced **MCIS** agent portal.
 - Ensured reliability, performance, and user satisfaction.
 - Worked on both back-end and front-end components using **AngularJS** and **Java** to provide a seamless user experience.
- **Corporate Website Enhancement:**
 - Worked on the enhancement of **INFIT's** corporate website.
 - Implemented new features and improved the overall user interface and experience.
 - Ensured the website was responsive, user-friendly, and aligned with the company's branding and objectives.
 - Utilized **HTML**, **CSS** (Bootstrap), and **ReactJS**, **Apache FreeMarker** and **Java**.

Jan 2023 – June 2023: Career Break (Self-taught Full Stack Web Developer)

- Independently acquired in-demand skills in **Full Stack Web Development** through **online bootcamps**, **tutorials**, and **self-study**.
- Demonstrated proficiency in building **end-to-end web applications** using the **MERN stack** (MongoDB, Express.js, React, Node.js).
- Applied knowledge of **HTML**, **CSS**, **JavaScript**, and modern frameworks (such as **React**) to create **responsive** and **interactive user interfaces**.
- Utilized **RESTful APIs** and integrated various **third-party libraries** to enhance functionality and improve user experience.
- Developed and deployed **multiple projects**, showcasing mastery of concepts like **database management**, **server-side programming**, and **front-end design**.
- Actively contribute to **open-source projects** on **GitHub**, continually enhancing personal coding skills and showcasing projects to the developer community.
- Leveraged **AWS Cloud technologies** to deploy and host applications, ensuring **scalability** and **high availability**.
- Created and maintained a **personal portfolio website** to showcase projects, skills, and accomplishments in web development.
- Continuously expanded knowledge through ongoing learning and exploration of new tools, frameworks, and industry trends.

Sept 2021 – Dec 2022: Huawei Technologies, Kuala Lumpur, as Assistant Product Engineer (Pre-Sales)

- Assigned to Asia Pacific Carrier Service and Software Department.
- Collaborated closely with the **account team** to **analyze customer requirements**, assess the **business environment**, and strategize **project win strategies** and **value propositions** for proposals.
- Engaged internal stakeholders, such as **product**, **engineering**, **service delivery**, and **assurance teams**, to ensure comprehensive support for the proposed solution from **order to delivery**.
- Supported **presales efforts**, including **solution design**, **request for quotation (RFQ)**, **bill of quantities (BOQ)**, **pre-sale testing**, and extensive customer-centric communication to drive business success.

- Produced and delivered **formal technical proposals** and **solution presentations** to key customers.
- Identified crucial **customer requirements** and **coordinated** with **Product Management** and Solution Teams to ensure seamless implementation in the product roadmap.

Achievements:

- Received the Galloping Horse Award (March 2022).
- TMForum Certified.

Oct 2020 – Jan 2021: DKSH CSSC, Kuala Lumpur as Intern, Technical Delivery – DevOps

- Collaborated with the team to initiate the implementation of a proof of concept (POC) for integrating **Continuous Integration** into the mobile development life cycle, providing valuable insights and support throughout the process.
- Utilized **Micro Focus UFT**, **Katalon Studio**, **Azure DevOps**, and automation frameworks like **Appium** and **Selenium** to create and execute robust test scripts, ensuring application quality.
- Supported the establishment of a staging environment and the integration of **Jenkins** with **Katalon Studio** on an **Azure cloud server**, facilitating defect detection and contributing to improvements in app performance.
- Contributed to the creation and updating of relevant documentation, ensuring accurate records of automation testing efforts and providing valuable insights for future implementation.

Side Projects:

Vanilla JS 20 Projects

- This repository features 20 diverse vanilla JavaScript projects, each containing its own folder with HTML, CSS, and JavaScript files. These projects were designed to enhance and showcase developers' JavaScript skills by exploring various aspects of the language. **Links:** [Github](#)

Sync Room

- Developed a real-time chatroom web application using Node.js, Socket.io, and Express. The application is hosted on AWS Elastic Beanstalk, providing seamless communication between users. **Links:** [Github](#) | [Project](#)

E-CommerceHub

- Created an e-commerce MERN web app with comprehensive functionality, including CRUD operations for products and categories, image uploading, advanced searching, and sorting. Implemented additional features such as user cart and order history, admin dashboards, and integration with the Braintree payment system. **Links:** [Github](#) | [Project](#)

My Estate Place

- Built a full-stack MERN web application for buying, selling, and renting properties. Integrated AWS services like IAM, S3, and SES for secure image and email handling. Leveraged Google Maps and Places APIs to provide enhanced property search functionalities. **Links:** [Github](#) | [Project](#)

Book Me Now

- Developed a MERN web application for a service booking marketplace. Users can buy and sell services or products, with secure payment processing through Stripe. **Links:** [Github](#) | [Project](#)

Code Editor Notebook

- Created an interactive browser-based coding environment using React and TypeScript. The application enables users to write and execute JavaScript code directly in the browser, with advanced features like syntax highlighting, error reporting, and other helpful tools. **Links:** [Github](#) | [Project](#)

My Portfolio

- Designed and developed a portfolio website to showcase my experience, education, skill sets, projects, certifications, and achievements.. **Links:** [Github](#) | [Project](#)

Others @ Github

- Additional small and medium-level projects are available on my GitHub account, totaling 30+ repositories. Please visit my GitHub profile to explore more projects and code samples. [Click here.](#)

SKILLS

Front-end:	HTML, CSS, Sass, JavaScript, React, Bootstrap, MUI, AntD
Back-end:	Node.js, Java, SpringBoot
Language:	JavaScript, TypeScript, Java
Database:	MongoDB, MySQL, PostgreSQL, MsSQL
Cloud/DevOps:	AWS, Terraform, Git
Automation Test:	Katalon
Soft-skills	Problem-solving, Collaboration, Communication, Continuous Learning, Presentation

EDUCATION CREDENTIALS

- **Bachelor of Information Systems (Honours) Information Systems Engineering**, from Universiti Tunku Abdul Rahman ([UTAR](#)), Kampar, Malaysia in March 2022 with a CGPA of 3.029.
FYP (2020-2021): Public Transit Navigation via Augmented Reality – Android mobile application that provides users with public transit navigation and navigates users via AR interfaces.
